## HYDRATION HEALTH

We believe we have the leading hydration product on the market, providing three to four times more electrolytes and a sugar-free amino acid delivery system that rapidly enhances absorption into the body. We recently found a gap in industrial hydration, with over 500,000 hospitalizations every year in the U.S. from workplace settings. We wanted to provide a product that works as hard as its users. Our products are designed to re-hydrate effectively and efficiently and make safe, productive work environments.
